► Introduction

Tokenomic is a DeFi crypto-currency token that is hosted on Binance Blockchain - Token Symbol (FTR), Which is introduced by BEP 20 with a Max Supply of 1 Million, It allows cross-chain to the holders. Tokenomic provides high-end security on transactions while working on Binance smart chain-based Blockchain system.

It is open-source and decentralized, with consensus achieved using proof of stake. It has been launched with a strong focus on decentralization and scalability, and it enables complete privacy. Tokenomic has a substantial Ecosystem around which includes Launchpad, Swap Exchange, Defi Ecosystem, NFT Marketplace, Gamefi, Exchange, and many other components to make the Tokenomic Network more efficient. So,Tokenomic is the most important part of the Tokenomic ecosystem.

► What is DeFi?

Decentralized finance (DeFi) is an emerging financial technology based on secure distributed ledgers similar to those used by cryptocurrencies. The system removes the control banks and institutions have on money, financial products, and financial services.

Some of the key attractions of DeFi for many consumers are:

- It eliminates the fees that banks and other financial companies charge for using their services.
- You hold your money in a secure digital wallet instead of keeping it in a bank.
- Anyone with an internet connection can use it without needing approval.
- You can transfer funds in seconds and minutes.

► Why is DeFi important?

DeFi takes the basic premise of Tokenomic — digital money — and expands on it, creating an entire digital alternative to Wall Street, but without all the associated costs (think office towers, trading floors, banker salaries). This has the potential to create more open, free, and fair financial markets that are accessible to anyone with an internet connection.

Powered by

► Why Tokenomic is a DeFi Token?

Open: You don't need to apply for anything or "open" an account. You just get access by creating a wallet.

Pseudonymous: You don't need to provide your name, email address, or any personal information.

Flexible: You can move your assets anywhere at any time, without asking for permission, waiting for long transfers to finish, and paying expensive fees.

Fast: Interest Rates and rewards often update rapidly (as quickly as every 15 seconds), and can be significantly higher than traditional Wall Street.

Transparent: Everyone involved can see the full set of transactions (private corporations rarely grant that kind of transparency)

► How does DeFi work?

Users typically engage with DeFi via software called dapps ("decentralized apps"), most of which currently run on the Ethereum blockchain. Unlike a conventional bank, there is no application to fill out or account to open.

Here are some of the ways people are engaging with DeFi today:

Lending: Lend out your crypto and earn interest and rewards every minute - not once per month.

Getting a loan: Obtain a loan instantly without filling in paperwork, including extremely short-term "flash loans" that traditional financial institutions don't offer.

Powered by

1. Trading: Make peer-to-peer trades of certain crypto assets — as if you could buy and sell stocks without any kind of brokerage.
2. Saving for the future: Put some of your crypto into savings account alternatives and earn better interest rates than you'd typically get from a bank.
3. Buying derivatives: Make long or short bets on certain assets. Think of these as the crypto version of stock options or futures contracts.

► MISSION

To try on unlocking Tokenomic potential and making Tokenomic easy to use.

To make Tokenomic market place with global reach.

To provide attention to the financial profits and safety of every single stakeholder.

To facilitate the ability of buyer-seller to transact a wallet in the most secure way.

► VISION

To create a global Tokenomic marketplace where buyers and sellers can buy, sell and trade Tokenomic in most secured and trusted manner.

To solve current problems of customers in a manner that make their business easier.

► Core Values

Be Magical. We are positive and kind above all else. Our main goal is to create happiness in other lives. Be Charitable We strive to be as giving as we can possibly be, helping out our community as much as we can. Be Sustainable We make decisions that are based on our long term health, not the short term gain. Be Transparent We strive to be open and honest with our community at all times, for the benefit of all.

► Ecosystem

Tokenomic is a company that aims to bring innovation and novelty to the gaming, defi, utilities, nft, sports, forex and crypto trading sector through its Blockchain technology. The ecosystem of Tokenomic very vast and broader as it is embedded with bsc that makes it more essential for the people associated with the agriculture and food sector.

► Binance Blockchain Technology

A decentralized open-source Blockchain-based operating system with smart contract capability, proof-of-stake principles for its consensus process, and a cryptocurrency unique to the system, known as Binance is a decentralized, open-source Blockchain-based operating system (BSC).

Powered by

► Working of Binance Smart Chain

Binance is founded on a few essential concepts, the most important of which is decentralization. All data on the Blockchain is completely unfettered and is not under the jurisdiction of a central authority. Content creators can receive Binance in return for sharing their work. Additionally, developers can create their own coins on the Binance network. These tokens can then be used in the network's user-created decentralized apps (Apps). Binance main token is used to back the newly issued tokens. The network's ultimate step of development is to support Binance -based games. These games would be totally decentralized, with users rewarding authors directly if they enjoyed the game. Binance's consensus algorithm is referred to as delegated proof-of-stake. In this system, transactions are authenticated by 27 super representatives who are responsible for keeping the transaction history. Super representatives are picked every six hours and compensated with a Binance coin created by the system. Every three seconds, a new block is added to the Binance Blockchain.

Powered by

► Supports Creators

Binance believes it is essential to support content owners more effectively, and a network is an amazing option. If you're a 2020 internet user, chances are you enjoy having to read digital content. Because content creators enable you to be happy while watching, it is only fair that they are compensated fairly for their efforts.

► Anonymous Transaction

Transactions on the Binance network are anonymous, but only on the network itself. The act of purchasing BNB and the requirement of using an exchange means that you will have to prove your identity to purchase Binance tokens in the first place. Transactions can, however, be carried out anonymously once on the network. On the other hand, it should be noted that all Blockchain keep a record of all transactions that take place on the chain. As a result, no transaction can ever be truly anonymous.

► Safe

Big Rich has a solid reputation in the cryptocurrency world. The amount of money spent by the company on security and the personnel it has hired demonstrates this. As with other cryptocurrencies, because it is a decentralized network, the individual bears a significant responsibility for safeguarding their tokens. In terms of the network as a whole, there has yet to be a security breach.

► Why Tokenomic ?

Zero Human Factor;-

The human factor is not taken into consideration. The smart contract is not dependent on anyone, and there is no way to prevent the platform from functioning.

Referral Provides ;-

There are no hidden fees, and all funds are transferred between members without any intermediaries. The contract balance is always a negative number.

Immutability of Conditions ;-

Nobody has the authority to ban you from the platform because the contract does not contain a provision for such a restriction.

Decentralization ;-

Instead of having managers or administrators in charge, there are only creators who are members of the community on the platform, just like everyone else.

Instant Transactions ;-

Profits earned by other members are transferred directly into your personal wallet. There is no hoarding in the system, and all of your earnings are yours to keep. Transparency and Anonymity ;-

Because the smart contract code is public, anyone can view the complete history of all transactions. This ensures that the conditions are pure and that the platform statistics are accurate.

► What Is “Decentralization”

DeFi is a collective term for financial products and services that are accessible to anyone who can use Ethereum – anyone with an internet connection. With DeFi, the markets are always open and there are no centralized authorities who can block payments or deny you access to anything. Services that were previously slow and at risk of human error are automatic and safer now that they're handled by code that anyone can inspect and scrutinize.

- A global, open alternative to the current financial system.
- Products that let you borrow , save,invest, trade, and more.
- Based on open-source technology that anyone can program with.

► Smart Contract

Binance Blockchain was designed to streamline communications. It ensures easy integration with a wide range of highly sophisticated programming languages. Binance is designed as a three-layered system. It consists of a core layer, storage layer, and application layer. Interestingly, each layer is optimized to perform a certain set of functions for a specific set of functionalities. It is the core layer that oversees the management of Binance smart contracts. Decentralized Finance or DeFi has emerged as the next-big-thing in the world. It has the potential to deliver better results to every single if implemented correctly. In a very short duration, this technology has shown strong prospects and already delivered some very impressive results to different industries. The DeFi Binance token is a new concept that is gaining a lot of traction and giving companies a chance to be more efficient.

► We work in the world in the world's potential

BTokenomic Global Network -Tokenomic an experienced organic product e-commerce company. It provides delivery service of fresh vegetables and fruits to the customers at their doorsteps by procuring all the produce from farmer's market every morning. This makes sure that customers get fresh produce every time they order. Procuring directly from farmer's market also reduces any intermediate costs and ensures best quality. The advantages of organic food are more based on perception than real facts. Much of this support of organic food as a healthier alternative comes from environmental groups who want to conserve the environment by avoiding pesticides and fertilizers. The producers of organic food strongly believe in the idea that organic food is superior to other types.

The organic e-commerce platform Tokenomic Network is being strengthened for directly linking farmers with retail as well as bulk buyers Interest in cryptocurrency is growing, and fast. With some pretty major brands, marketplaces and payment processors announcing their adoption of crypto, this digital payment method is firmly on the radars of retailers across the globe. Whilst not everyone thinks the world is ready for cryptocurrency payments, it's certainly getting harder to ignore the impact that crypto and the Blockchain technology on which it's built could have on e-commerce. Whether you're an e-commerce merchant just dipping your toes into the cryptocurrency waters, or you're sold on the idea of crypto payments and are exploring how to accept them in your online store, it's important to keep on top of how this trend is unfolding. After all, awareness and understanding today could help forge a valuable opportunity for your business in the future.

► OUR TEAM

The safety issue is very crucial in every field and can affect the condition of a business and its performance. The companies need to take steps to ensure safety around their files and the account of the employees working with important clients. To make sure that everyone gets the best services for getting safety in their work environment and personal level, Tokenomic is planning on hiring professional people who know everything related to the safety concerns that might arise in the business world. With the help of professional people, users can get the solution to their problems very easily and do not have to worry about their data. The data includes the work that has been done by the company or the employees which contains the details of the clients. It can be misused if it gets in the wrong hands which affects the reputation of the company.

It is a safe, speedy and mobile-based, digital and decentralized solution in the palms of your hands. This solution is capable of ensuring hassle-free access to your accounts. All in all, it is a true medium of decentralized payments. The main thing users will get is a global and competitive money transfer system. This system will have the ability to help exchange FIAT currencies as well as Cryptocurrencies and vice versa. Tokenomic is a cryptocurrency that will reward users for making payments in all walks of life. It has everything required to eliminate barriers in the way of worldwide adoption of cryptocurrency usage. Finally, in simple words, everything said in this whitepaper makes Big Rich a safe and reliable decentralized currency and financial ecosystem ready for launch worldwide.
